

Psychiatric Rehabilitation Approach (PRA)

PRA is a psychiatric rehabilitation service that assists individuals in developing skills and accessing resources needed to increase their capacity to be successful in the living, working, learning and social environments of their choice. Psychiatric rehabilitation promotes: recovery, full community integration and improved quality of life.

During the summer and fall of 2016, Boston University will conduct trainings including PRA 101, PRA Practitioners, PRA Trainers and PRA Refresher at no cost to the participant through the Certified Community Behavioral Health Clinic (CCBHC) planning grant. PRA trainings will be open to a limited number of providers and preference will be given to staff from applicants of the CCBHC Request for Proposal.

More information about the trainings will be forthcoming, including details on registration, dates and locations.
